

A token backed by an untouchable reserve, launched step by step

Issuer to be domiciled in El Salvador · audited presale, then an offering registered with the CNAD

The launch, in two phases

Phase 1: one audit by a recognised firm (CertiK, Hacken or SolidProof), a private presale to initial investors with KYC, and marketing. Phase 2, paid with the funds raised: company, registrations and the public offering.

The reserve is never put at risk

100% in custody, off the exchange. The trading system can lose at most the reserve's annual yield ($\approx 4\%$); a global cap stops every agent when it is reached. The worst year ends with the reserve at 100%.

Eleven trading agents

One per subaccount of \$1M, at most \$200,000 at stake each, deployed in tranches from \$50,000. Neutral, hedged long and short strategies that offset each other.

Five layers of protection

Stop loss on every order, isolated margin, a 20% cap and -10% / -20% limits per subaccount, the global annual cap and a reserve kept off the exchange.

Real backtest · 6 years of markets (Oct 2020 – Aug 2026)

−7.8%

worst portfolio drawdown (BTC: -76.7%)

−2.5%

worst portfolio year

+1.9%

during LUNA and Celsius (BTC: -48.1%)

−0.1%

during FTX (BTC: -24.5%)

8 subaccounts with the plan's settings on the real history of 104 cryptocurrencies. The risk is proven; the returns are not: $+1.3\%$ over six years ($+0.2\%$ a year on average). The target will be set after adjusting the agents and 6 months on demo.

TOKEN (61.74M PUDA)	%	USE OF FUNDS	%
Sale	15%	Locked liquidity (24 months)	30%
Liquidity pool	5%	Trading system reserve (only its yield at risk)	25%
Team and promotion (1-year lock + 4-year release)	5%	Treasury and gold reserve	20%
Treasury (tranches only with a new registration)	75%	Legal, audits · Development · Contingency	10 · 10 · 5%

WHEN	WHAT
Q4 2026	Audit by one recognised firm; audit report published
Q1 2027	Private presale and marketing to initial investors
Q1–Q2 2027	Company, UIF, CNAD issuer registration, DIR and certifier
Q3 2027	Public offering via DASPs; quarterly reports from then on

For information only: not an offer of securities or an investment recommendation. The presale is private and subject to legal confirmation in El Salvador; the public sale happens only after CNAD registration and is not available in the EU or the US until it complies with their rules. No past or simulated result guarantees future results. Contact: [Your name · email].
