

A token backed by an untouchable reserve, launched step by step

Issuer to be domiciled in El Salvador · audited presale, then an offering registered with the CNAD

The launch, in two phases

Phase 1: one audit by a recognised firm (CertiK, Hacken or SolidProof), a private presale to initial investors with KYC, and marketing. Phase 2, paid with the funds raised: company, registrations and the public offering.

The reserve is never put at risk

100% in custody, off the exchange. The trading system can lose at most the reserve's annual yield (≈4%); a global cap stops every agent when it is reached. The worst year ends with the reserve at 100%.

Eleven trading agents

One per subaccount of \$1M, at most \$200,000 at play each, deployed in tranches from \$50,000. Neutral, hedged long and short strategies that offset each other.

Five layers of protection

Stop loss on every order, isolated margin, a 20% cap and -10% / -20% limits per subaccount, the global annual cap and a reserve kept off the exchange.

Stress test · 3 simulated years of extreme markets

-6.7%

worst combined drawdown

-3.4%

worst combined month

-0.4%

in BTC's worst months (BTC -34%)

1 of 36

years the 4% cap would trigger

Risk test on simulated markets (full cycle with LUNA/FTX-type crashes, 3-year bear, sideways). It does not predict returns; a backtest on real history and months on demo come first.

Token and use of funds

TOKEN (61.74M PUDA)	%	USE OF FUNDS	%
Sale	15%	Locked liquidity (24 months)	30%
Liquidity pool	5%	Trading system reserve (only its yield at risk)	25%
Team and promotion (1-year lock + 4-year release)	5%	Treasury and gold reserve	20%
Treasury (tranches only with a new registration)	75%	Legal, audits · Development · Contingency	10 · 10 · 5%

Timeline

WHEN	WHAT
Q4 2026	Audit by one recognised firm; seal published
Q1 2027	Private presale and marketing to initial investors
Q1-Q2 2027	Company, UIF, CNAD issuer registration, DIR and certifier
Q3 2027	Public offering via licensed providers; quarterly reports from then on

Informational document, not an offer of securities or investment advice. The presale is private and subject to legal confirmation in El Salvador; the public sale happens only after CNAD registration and is not available in the EU or the US until it complies with their rules.
